

# Allianz China A-Shares

- Capturing the opportunities Chinese companies present on the back of improving fundamentals and steady growth momentum
- A focused portfolio of high conviction stocks that fits the criteria of growth, quality and valuation
- Key investment themes focusing on domestic-driven growth

# Allianz China A-Shares

The Fund aims at long-term capital growth by investing in A-shares markets in China. Its investment approach is based on taking advantage of the pricing inefficiencies inherent in a retail-dominated market.

## China's evolving economic importance

- China is the world's second largest economy\* today and the China A-shares markets is the most direct way to access this opportunity.
- The China A-shares markets encompasses over 5,100 listed companies worth USD 15.2 trillion across the entire market capitalisation spectrum, and accounts for about 70% of China's total equity market capitalisation.
- Global investors have added significantly to China A-shares exposure since the asset class became more widely accessible. We believe this trend will continue to reflect the size and scale of China's economy and financial markets.

China A-Shares may provide foreign investors broad access to significant opportunities

Based on nominal gross domestic product (GDP) in USD.

## Low correlations with potential diversification benefits to other asset classes

- The Chinese domestic market exhibits relatively low correlation with other widely held asset classes, because the Chinese domestic market is influenced by unique economic, political, and monetary policy considerations.
- China A-shares are dominated by domestic retail investors, frequently resulting in a different performance outcome compared to other global equity markets.
- China A-shares may add meaningful portfolio diversification, and help investors generate a better overall risk return profile.

## A wide range of investment opportunities

- China's old growth model was based on low-cost exports. This has already started to change. The future growth model will increasingly be focused on areas such as innovation and the development of new technologies.
- Structural growth areas such as consumer, technology, renewables and health care are better represented in China A-shares markets.

# Fund Features

## Investing with conviction

- By applying three key criteria – growth, quality and valuation, the Fund aims to build a high conviction portfolio of around 50-70 high conviction stocks that may offer exposure to China’s long-term economic growth potential across various sectors.
- The investment team focuses on fundamental stock selection, leveraging deep local expertise and unique Grassroots Research® as well as ESG Research, which provide valuable market insights, to make the best investment decisions.

Key stock criteria

Source: Allianz Global Investors, 2026. Information herein is valid as at the time of publication. During any given stage of the investment process, the selection criteria may vary from those shown above. The diagrams above reflect the typical investment process applied to this strategy/fund. At any given time, other criteria may affect the investment process. There is no guarantee that these investment strategies and processes will be effective under all market conditions and investors should evaluate their ability to invest for a long-term based on their individual risk profile especially during periods of downturn in the market. The Grassroots Research® division of Allianz Global Investors commissions investigative market research for asset-management professionals. Research data used to generate Grassroots Research® reports are received from independent, third-party contractors who supply research that, as far as permissible by applicable laws and regulations, may be paid for by commissions generated by trades executed on behalf of clients.

## Diverse opportunities in China’s growth story

The Fund provides access to China’s long-term growth drivers

- Self-sufficiency** – Geopolitics drives localisation across a range of industries such as software, semiconductor, health care and energy supply. This supports the development of advanced manufacturing in sectors such as autos and machinery.
- Artificial Intelligence** – An emerging Chinese AI startup is a likely catalyst for a surge in AI applications eg, humanoid robots, autonomous driving and other software. An expanding ecosystem of technology hardware supports computing power and software.
- New consumption** – Trading down to lower-priced items, with more focus on consumer experience. This benefits domestic brands in areas such as pet economy, collectible toys, snacks, beverages, jewellery and cosmetics.
- Healthcare/Biotech** – Significant step up in new drugs under development, growing demand from global pharmaceutical companies to license domestically-produced drugs for sale outside China.
- Shareholder returns / dividends** – An increased focus on corporate governance and improving shareholder returns, with central bank provisions of credit for share buybacks and dividends. In a lower interest rate environment, higher dividend yields are favoured.

Areas where we see sustained growth potential
