

Allianz China A-Shares

- Capturing the opportunities Chinese companies present on the back of improving fundamentals and steady growth momentum
- A focused portfolio of high conviction stocks that fits the criteria of growth, quality and valuation
- Key investment themes focusing on domestic-driven growth

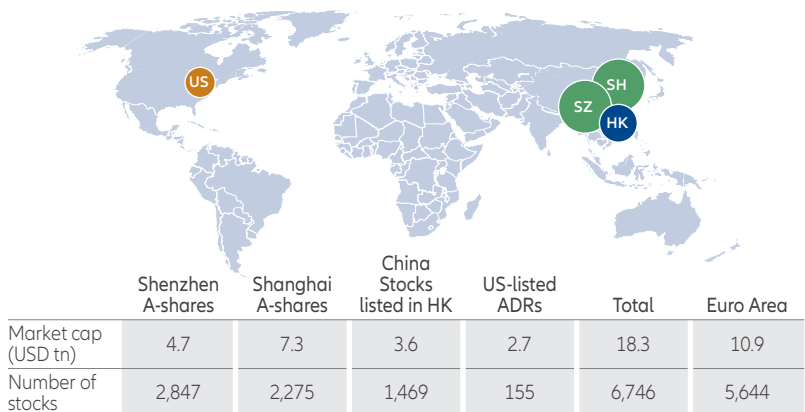

Allianz China A-Shares

The Fund aims at long-term capital growth by investing in A-shares markets in China. Its investment approach is based on taking advantage of the pricing inefficiencies inherent in a retail-dominated market.

China's evolving economic importance

- China is the world's second largest economy* today and the China A-shares markets is the most direct way to access this opportunity.
- The China A-shares markets encompasses over 5,000 listed companies worth USD 12 trillion across the entire market capitalisation spectrum, and accounts for more than 65% of China's total equity market capitalisation.
- Global investors have added significantly to China A-shares exposure since the asset class became more widely accessible. We believe this trend will continue to reflect the size and scale of China's economy and financial markets.

China A-Shares may provide foreign investors broad access to significant opportunities

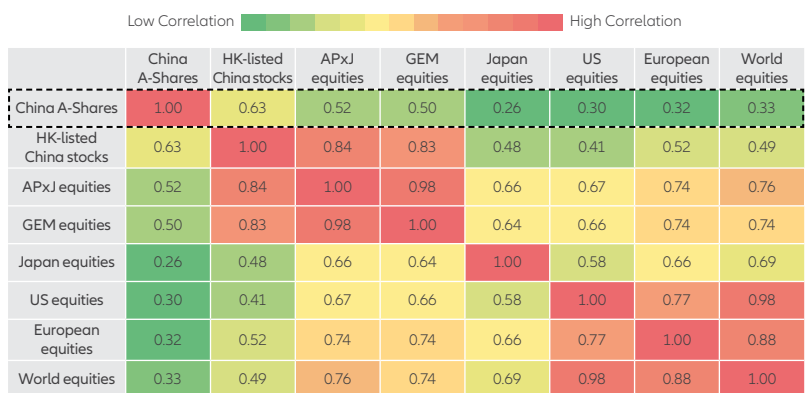

Source: World Federation of Exchanges (WFE), Hong Kong Stock Exchange, Wind, Top Foreign Stocks, Allianz Global Investors, as of 30 November 2024. China stocks listed in Hong Kong and Euro Area data are as of 31 August 2024. The total figures are for comparison only, the stocks included may be listed in more than one exchange. Offshore China stocks are defined based on companies with ultimate parent domiciled in China. Suspended stocks, investment funds and unit trusts are excluded. The information above is provided only for illustrative purposes, it should not be considered a recommendation to purchase or sell any particular security or strategy or an investment advice. *Source: International Monetary Fund, October 2024. Based on nominal gross domestic product (GDP) in USD.

Low correlations with potential diversification benefits to other asset classes

- The Chinese domestic market exhibits relatively low correlation with other widely held asset classes, because the Chinese domestic market is influenced by unique economic, political, and monetary policy considerations.
- China A-shares are dominated by domestic retail investors, frequently resulting in a different performance outcome compared to other global equity markets.
- China A-shares may add meaningful portfolio diversification, and help investors generate a better overall risk return profile.

Historical correlation between major equity markets

Source: Bloomberg, Allianz Global Investors, as of 30 November 2024. Correlation data is calculated based on historical return of respective MSCI indices for the past 10 years, using weekly USD return. The information above is provided only for illustrative purposes, it should not be considered a recommendation to purchase or sell any particular security or strategy or an investment advice. Past performance, or any prediction, projection or forecast, is not indicative of future performance.

A wide range of investment opportunities

- China's old growth model was based on low-cost exports. This has already started to change. The future growth model will increasingly be focused on areas such as innovation and the development of new technologies.
- Structural growth areas such as consumer, technology, renewables and health care are better represented in China A-shares markets.

Fund Features

Investing with conviction

- By applying three key criteria – growth, quality and valuation, the Fund aims to build a high conviction portfolio of around 50-70 high conviction stocks that may offer exposure to China’s long-term economic growth potential across various sectors.
- The investment team focuses on fundamental stock selection, leveraging deep local expertise and unique Grassroots Research® as well as ESG Research, which provide valuable market insights, to make the best investment decisions.

Key stock criteria

Source: Allianz Global Investors, 2024. Information herein is valid as at the time of publication. During any given stage of the investment process, the selection criteria may vary from those shown above. The diagrams above reflect the typical investment process applied to this strategy/fund. At any given time, other criteria may affect the investment process. There is no guarantee that these investment strategies and processes will be effective under all market conditions and investors should evaluate their ability to invest for a long-term based on their individual risk profile especially during periods of downturn in the market. The Grassroots Research® division of Allianz Global Investors commissions investigative market research for asset-management professionals. Research data used to generate Grassroots Research® reports are received from independent, third-party contractors who supply research that, as far as permissible by applicable laws and regulations, may be paid for by commissions generated by trades executed on behalf of clients.

Diverse opportunities in China’s growth story

The Fund provides access to China’s long-term growth drivers

- Self-sufficiency – Technology catch-up drives import substitution and market share gains across a broad range of industries – software, semiconductors, healthcare and energy supply.
- Artificial Intelligence – An expanding ecosystem of technology hardware such as servers, power management systems in support of computing chips and software.
- Manufacturing upgrade – Strategic government policy focus on enhancing technology-enabled manufacturing base. Increasing competitive advantage both in domestic and overseas markets in areas like automotive, machinery, power transmission and equipment.
- Domestic consumption – Focus on the rising market share of domestic brands, often with lower price points, as consumers seek value for money in the challenging macro environment.
- Capital market reform – Increased focus on corporate governance and improving shareholder returns, provision of credit for share buybacks and higher dividend payouts. Long-term trend toward increased equity allocations to benefit select financial services companies.

Areas where we see sustained growth potential

Source: All fund data quoted are Allianz Global Investors/IDS GmbH/Morningstar, as at 31 December 2024, unless stated otherwise. Allianz Global Investors Fund – Allianz China A-Shares was launched on 23 October 2019 upon the merger of Allianz Global Investors Opportunities – Allianz China A-Shares into the Fund. The performance information shown on or before the date of the merger has been simulated based on the performance of the relevant share class of Allianz Global Investors Opportunities – Allianz China A-Shares with the same investment objectives, risk profiles, and materially the same fee structures and investment policies of the relevant share class of the Fund. Predecessor fund (Allianz Global Investors Opportunities – Allianz China A-Shares) inception date: March 2009.

- The Fund size quoted includes all share classes of the Fund.
- The All-in-Fee includes the expenses previously called management and administration fees.
- Total Expense Ratio (TER): Total cost (except transaction costs) charged to the Fund during the last financial year expressed as a ratio of the Fund's average NAV. For share classes that have been incepted for less than one year as at close of the last financial year (please refer to the Inception Date in the Fund Details table), the TER will be annualised. For share classes incepted after the close of the last financial year, the TER will be reflected as N/A.
