[#]The dividend per share is as of 28 February 2025. Past payout yields and payments do not represent future payout yields and payments. Historical payments may comprise of distributable income or capital, or both (for further details, please refer to our website).

Dividend payments may, at the sole discretion of the Investment Manager, be made out of the Fund’s capital or effectively out of the Fund’s capital which represents a return or withdrawal of part of the amount investors originally invested and/or capital gains attributable to the original investment. This may result in an immediate decrease in the NAV per share and the capital of the Fund available for investment in the future and capital growth may be reduced. Dividend payments are applicable for Class AM Dis (monthly distribution) and for reference only but not guaranteed. Dividend payments are made in the respective currency indicated. Positive distribution yield does not imply positive return. For details, please refer to the Fund’s distribution policy disclosed in the offering documents.

Position for Income and Potential Growth

A multi-asset portfolio offers an effective means to achieve diversification.

Through the three asset classes, with their favourable risk/reward profile, the Fund allows for potentially reduced exposure to volatility compared to an equity-only fund, along with a low correlation to rate-sensitive investments.

Income and Growth asset classes offer compelling risk/return profile

- As at 28 February 2025. Annualised Dividend Yield = $[(1 + \text{Dividend Per Share/Ex} = \text{Dividend Date NAV})^{1/2} - 1] \times 100$. The annualised dividend yield is calculated based on the latest dividend distribution with dividend re-invested, and may be higher or lower than the actual annual dividend yield. Positive distribution yield does not imply positive return. Dividend is not guaranteed.
- In an environment where interest rates may trend upward, rising rates would negatively impact most bond funds, and fixed income securities held by a fund are likely to decrease in value. Bond funds and individual bonds with a longer duration (a measure of the expected life of a security) tend to be more sensitive to changes in interest rates, usually making them more volatile than securities with shorter durations. Note: Fixed income up and down quarters are based on quarterly performance of the Barclays U.S. Government Credit Bond Index.
- "Offer-Bid" performance data takes into account up to 5.00% of the initial fee of the investment.
- The All-in-Fee includes the expenses previously called management and administration fees.

Allianz Global Investors and Voya Investment Management entered into a long-term strategic partnership on 25 July 2022, upon which the investment team transferred to Voya Investment Management. This did not materially change the composition of the team, the investment philosophy nor the investment process. Management Company: Allianz Global Investors GmbH. Delegated Manager: Voya Investment Management Co. LLC ("Voya IM").

However, if you choose not to seek professional advice, you should consider the suitability of the product for yourself. Past performance of the fund manager(s) and the fund is not indicative of future performance. Prices of units in the Fund and the income from them, if any, may fall as well as rise and cannot be guaranteed. Distribution payments of the Fund, where applicable, may at the sole discretion of the Manager, be made out of either income and/or net capital gains or capital of the Fund. As a result of the payment, the Fund's net asset value is expected to be immediately reduced. The dividend yields and payouts are not guaranteed and might change depending on the market conditions or at the Manager's discretion; past payout yields and payments do not represent future payout yields and payments. Investment involves risks including the possible loss of principal amount invested and risks associated with investment in emerging and less developed markets. The Fund may invest in financial derivative instruments and/or structured products and be subject to various risks (including counterparty, liquidity, credit and market risks etc.). Investing in fixed income instruments (if applicable) may expose investors to various risks, including but not limited to creditworthiness, interest rate, liquidity and restricted flexibility risks. Changes to the economic environment and market conditions may affect these risks, resulting in an adverse effect to the value of the investment. During periods of rising nominal interest rates, the values of fixed income instruments (including short positions with respect to fixed income instruments) are generally expected to decline. Conversely, during periods of declining interest rates, the values are generally expected to rise. Liquidity risk may possibly delay or prevent account withdrawals or redemptions. Past performance, or any prediction, projection or forecast, is not indicative of future performance.
