Environmental and social contributions can be defined e.g., along the UN SDGs, as well as the taxonomy objectives. The computation of the positive contribution for the Funds is based on a quantitative framework, complemented by qualitative inputs by sustainability research. The methodology applied first breaks down a company into its business activities in order to assess whether these activities are providing a positive contribution to environmental and/or social objectives. Following the mapping of business activities, an asset-weighted aggregation on portfolic level is conducted in order to compute a percentage share of positive contribution per portfolio.
Valuation/ Dealing Day	: Means each day on which banks and exchanges in Luxembourg, Germany and the United States are open for business.
