

Allianz US Short Duration High Income Bond

- Seeks to achieve income through monthly payouts
- Diversification to overall fixed-income allocation
- Proven investment capability in managing short duration, high-yielding assets

Allianz US Short Duration High Income Bond

The Fund focuses to generate a high level of current income with below-average market volatility by investing in high quality US non-investment grade credit with short maturity.

Attractive yield relative to duration

- Short duration high yield bonds provide investors the opportunity to generate high yield-like return with less risk.
- Investors have the most visibility on bond issuers' ability to service and repay their debts, thereby limiting default risks.

US high yield market exhibits risk/return variability by maturity

Data from November 2009 to June 2024. 0-5 Yr US High Yield (HY) is represented by ICE BofA 0-5 Year US High Yield Constrained Index; 1-3 Yr US HY is represented by ICE BofA 1-3 Year US Cash Pay High Yield Index; 3-5 Yr US HY is represented by ICE BofA 3-5 Year US Cash Pay High Yield Index; 5-7 Yr US HY is represented by ICE BofA 5-7 Year US Cash Pay High Yield Index; 7-10 Yr US HY is represented by ICE BofA 7-10 Year US Cash Pay High Yield Index; US High Yield Bonds is represented by ICE BofA US High Yield Index. Past performance, or any prediction, projection or forecast, is not indicative of future performance.

Less volatility and smaller drawdown

- Short duration high yield bonds are less sensitive to interest rate risk relative to longer duration bonds.
- High yield bonds tend to benefit from credit spread tightening in a falling rates environment; and higher coupon income help mitigate downside risk in a rising rates environment.

Interest rate risk

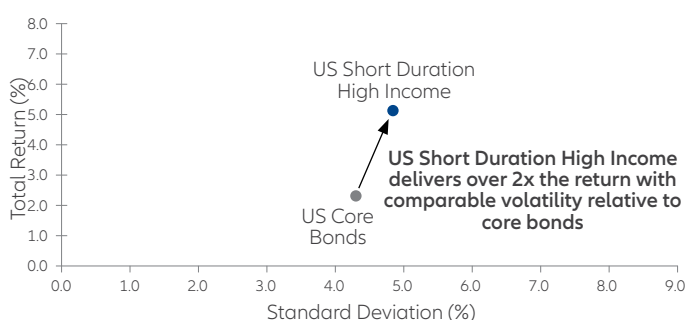

Source: ICE Data Services and Bloomberg, data from November 2009 to June 2024. Market participation is based on the average of monthly returns in up and down markets as determined by the respective Index. Past performance, or any prediction, projection or forecast, is not indicative of future performance.

Diversification benefits

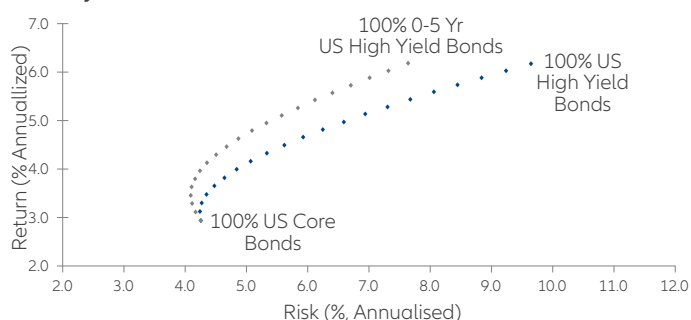

- Historically, short duration high yield bonds captured more than two times the return of core bond market return with comparable volatility.
- Adding short duration high yield bonds to a bond portfolio could help enhance returns and reduce risks.

Active management of short duration high yield bonds delivers a core alternative

US High Yield Bonds is represented by ICE BofA US High Yield Index; 0-5 Yr US High Yield Bonds is represented by ICE BofA 0-5 Year US High Yield Constrained Index; US Core Bonds is represented by Bloomberg US Aggregate Bond Index. Past performance, or any prediction, projection or forecast, is not indicative of future performance.

Fund Features

Monthly dividends

The Fund aims to pay a monthly dividend.

Allianz US Short Duration High Income Bond Class AM (USD) Dis. – Monthly dividend per share

* The dividend per share is as at 30 June 2024. Past payout yields and payments do not represent future payout yields and payments. Historical payments may comprise of distributable income or capital, or both (for further details, please refer to our website). Dividend payments may, at the sole discretion of the Investment Manager, be made out of the Fund’s capital or effectively out of the Fund’s capital which represents a return or withdrawal of part of the amount investors originally invested and/or capital gains attributable to the original investment. This may result in an immediate decrease in the NAV per share and the capital of the Fund available for investment in the future and capital growth may be reduced. Dividend payments are applicable for Class AM Dis (monthly distribution) and for reference only but not guaranteed. Positive distribution yield does not imply positive return. For details, please refer to the Fund’s distribution policy disclosed in the offering documents.

Attractive risk/return profile

US high-yield bonds contribute from both a diversification and a relative-performance perspective, offering a very compelling yield opportunity with lower interest-rate sensitivity.

The Fund remains an attractive fixed income solution as investors adjust to tighter monetary conditions without taking excess credit risk. The shorter maturity puts securities first in line for repayment, and this reduces price volatility that may otherwise be amplified in passively managed funds.

Historical risk/return of US fixed income landscape

Allianz Global Investors and Voya Investment Management (Voya IM) have entered into a long-term strategic partnership, and as such, as of 25 July 2022, the investment team transferred to Voya IM and Voya IM became the delegated manager for this fund. AllianzGI continues to provide information and services to Voya IM for this investment through a transitional service agreement.

The information presented here is intended for general circulation and does not constitute a recommendation to anyone; it also has not taken into account the specific investment objectives, financial situation or particular needs of any particular person. Information herein is based on sources we believe to be accurate and reliable as at the date it was made. We reserve the right to revise any information herein at any time without notice. No offer or solicitation to buy or sell securities and no investment advice or recommendation is made herein. In making investment decisions, investors should not rely solely on this publication but should seek independent professional advice. However, if you choose not to seek professional advice, you should consider the suitability of the product for yourself. Past performance of the fund manager(s) and the fund is not indicative of future performance. Prices of units in the Fund and the income from them, if any, may fall as well as rise and cannot be guaranteed. Distribution payments of the Fund, where applicable, may at the sole discretion of the Manager, be made out of either income and/or net capital gains or capital of the Fund. As a result of the payment, the Fund's net asset value is expected to be immediately reduced. The dividend yields and payouts are not guaranteed and might change depending on the market conditions or at the Manager's discretion; past payout yields and payments do not represent future payout yields and payments. Investment involves risks including the possible loss of principal amount invested and risks associated with investment in emerging and less developed markets. The Fund may invest in financial derivative instruments and/or structured products and be subject to various risks (including counterparty, liquidity, credit and market risks etc.). Investing in fixed income instruments (if applicable) may expose investors to various risks, including but not limited to creditworthiness, interest rate, liquidity and restricted flexibility risks. Changes to the economic environment and market conditions may affect these risks, resulting in an adverse effect to the value of the investment. During periods of rising nominal interest rates, the values of fixed income instruments (including short positions with respect to fixed income instruments) are generally expected to decline. Conversely, during periods of declining interest rates, the values are generally expected to rise. Liquidity risk may possibly delay or prevent account withdrawals or redemptions. Past performance, or any prediction, projection or forecast, is not indicative of future performance. Investors should read the Prospectus obtainable from Allianz Global Investors Singapore Limited or any of its appointed distributors for further details including the risk factors, before investing.
